If you have diabetes., you are susceptible to poor circulation and nerve damage. And when nerve damage hits, you lose feeling in your feet. Simple cuts may go undetected, which can lead to open sores, ulcers, and even amputation.

These are just a few of the 101 questions answered in this indispensable new book for people with diabetes:

- What should I do if I nick myself while trimming my toenails?
- How can I tell whether my shoes fit?
- What should I do if I have a bunion?
- How do I avoid getting foot ulcers?
- What kind of tests do I need for peripheral vascular disease (PVD)?
